

## Quercus robur Pedunculate Oak

### Category of FRM (Forestry Reproductive Material)

**Source Identified (SI)** Seed collected from a single stand where no specific growth characteristics have been registered.

**Selected** Collected from stands showing superior characteristics e.g. better form, growth rate and health.

**Qualified** An orchard grown from selected plus trees based on form and growth rate.

**Tested** A stand or orchard which has undergone genetic testing for superior characteristics.

### Selected Stand

ID: qroST20-01SE - Lennoxlove Estate

Available Oct 2015

Our Cell Grown Pedunculate Oak uses seed from the Lennoxlove Estate so will be suited to the cooler regions of the UK. This Selected Stand shows superior characteristics over Pedunculate Oak of general provenance.

Year Planted:	1844	Region of Provenance:	203
Area ( Hectares ):	2.5	Altitude:	75
Rainfall:	680	Aspect:	E
Slope:	Slight	Exposure:	Moderate
Site Vegetation:	Wavy Hair + Bent Grass	Soil Type:	Brown Earth
Accumulated Temp F:	1358	Soil Moisture Regime:	Slightly Dry

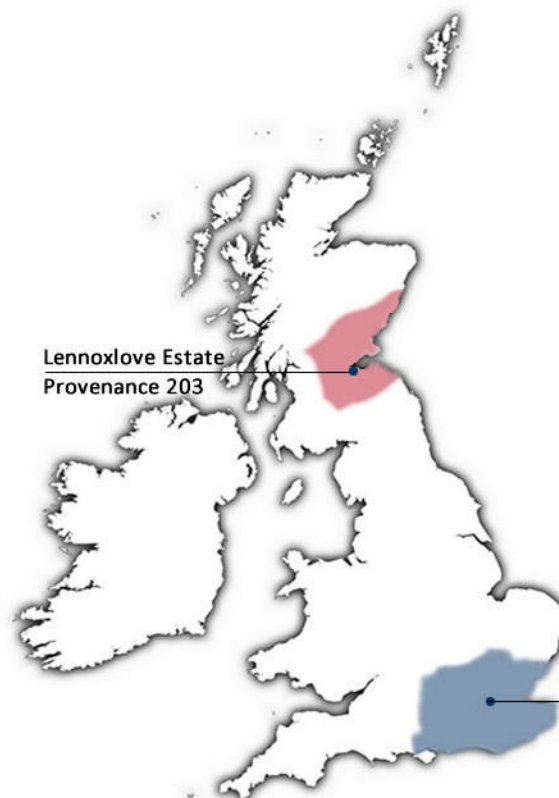

### Selected Stand

ID: qroST40-05SE - Windsor Estate

Available Oct 2015

Our Cell Grown Pedunculate Oak uses seed from the Windsor Estate so will be suited to the warmer regions of the UK. This Selected Stand shows superior characteristics over Pedunculate Oak of general provenance.

Year Planted:	1850	Region of Provenance:	405
Area ( Hectares ):	25.8	Altitude:	75
Rainfall:	700	Aspect:	Flat
Slope:	Flat	Exposure:	Moderate
Site Vegetation:	Bent - grass, Bramble and Rose	Soil Type:	Brown Earth
Accumulated Temp F:	1822	Soil Moisture Regime:	Fresh
